I wonder if I am using the right amount of water? The water bills are too high. We need to conserve. Have you seen Scottsdale’s water app?

This app helps me calculate the right amount of water for my grass, trees and bushes. I simply enter the data and the WC-Tool identifies the landscaping to enhance conservation efforts.

It tells me exactly how much to use. Now look at my bill. The plants are happy and so am I!

The water is too high. I clearly see we are using too much water.
