I'm afraid to fall in the night. Can you help?

Yes! We can use your Alexa to keep you safe. We will connect it to a pad by your bed that will sense when you get up.

Let me know when you feel safe to stand up. I will turn the lights up more so you can see better.

Are you getting up? I will turn the lights on low.

Alexa is programmed to ask how you are feeling too so you will feel like have someone looking out for you.

When you step on the pad, Alexa will be alerted and will be at your service.

Now I can feel safe in the night.

Thanks to Alexa and this new app I can get up without worry.
